

A stroke
is a _____
attack

Brain

True or False.
High blood
pressure is a
risk factor for
stroke?

True

If you think
someone is
having a stroke,
you should?

Call
"911"

A stroke
occurs in
what part of
the body?

Brain

True or False.
Women are more likely to die from breast cancer than stroke.

False

True or False.
Stroke is a leading cause of death in the US.

True

True or False.
Stroke causes
more serious
long-term
disabilities than
any other disease.

True

FAST helps us
remember the
signs of stroke.
What does the
"F" stand for?

Face
Drooping

FAST helps us remember the signs of stroke. What does the "A" stand for?

Arm
Weakness

FAST helps us remember the signs of stroke. What does the "S" stand for?

Speech
Difficulty

FAST helps us remember the signs of stroke. What does the "T" stand for?

Time to
Call 911

Stroke symptoms that last only a short time and then disappear is called a _____

TIA
(Transient
Ischemic
Attack)

Time is _____!

Brain

True or False.
A TIA (Transient Ischemic Attack) means that you could have a major stroke. You should be medically evaluated immediately.

True

True or False.
Smoking
increases your
risk of stroke.

True

How many neurons
(brain cells) does a
typical person lose
each minute during
an untreated
stroke?

1.9
million

A stroke is
an _____!

Emergency

True or False. A stroke happens when a blood vessel that carries oxygen and nutrients to the brain is blocked by a blood clot or bursts.

True

List a common risk factor for stroke

High Blood Pressure,
Diabetes Mellitus,
High Cholesterol,
Atrial Fibrillation

What can people do in their daily life to decrease their risk of stroke?

Eat
healthy or
exercise

Can you name
one bad habit
that could
increase the
risk of stroke?

Cigarette
Smoking,
eating
unhealthy food,
couch potato

An adult
human brain
weighs _____
pounds

3

About 78%
of the brain
is made of
_____.

Water

How many
nerve cells or
neurons are
in the brain?

100
billion

Name
the 5
senses.

Vision,
Hearing,
Smell, Taste
and Touch

True or False.
The Cerebrum
has 4 lobes
each with a
unique function.

True

What are
the 3 main
areas of the
brain?

Cerebrum,
Cerebellum
and the
brainstem

The brain has
four lobes.
Please list
them

Frontal,
Parietal,
Temporal
and Occipital

The Frontal lobe controls what functions?

Controls reasoning, planning, parts of speech, movement (motor cortex), emotions and problem-solving.

List the Occipital lobe's function?

Controls many aspects of vision.
